NOTES:

1. All high-speed receptacles have fluoropolymer interfacial seals.
2. Staggered leads always start on the major side for the first high speed module.
3. Single-sided leads are always on the major side.

* = Left and right key is determined by looking at the PLUG interface with the LONG SIDE downward. The key is the angled side of the interface.

** = Captivated hardware is factory installed and non-removable.

*** = Refer to catalog Page 29 for keying options.
