

**July 16, 2019**

**To our Customers:**

**RE: EU REACH Conformance 2008 and Beyond  
(including items added as of July 16, 2019 (201))**

At this time in the administration of REACH, AirBorn has a duty as part of the non-retail supply chain to ensure that the ingredients (a/k/a Substances) in the blended end-products (a/k/a Preparations) and/or finished hard-good products (a/k/a Articles) provided to us, and then sold by us to you, are properly pre-registered and/or registered for the relevant intended use. This is of key importance to ensure the uninterrupted flow of your goods within EU commerce.

The purpose of this letter to you, our customer, is to ensure you are aware of our activities as related to compliance with REACH. In summary, AirBorn has confirmed that our family of Interconnect and Value Added products are imported into the EU in context of Articles without Intended Release and therefore are not subject to registration.

AirBorn will continue to review SVHC lists published by the EU and, where appropriate, work with our supplier base to perform the proper assessment for any future impact. As of this date, based on the data supplied by our suppliers, AirBorn is in compliance with the REACH requirements.

*Thank you,*

Joe Xuereb  
Director of Supply Chain Management

Christopher J. Wegmann  
Vice President & Chief Compliance Officer
